[LH5] Latest advances in cancer science and medicine: From basic to clinical applications - Taurus 1 (2:00 PM - 3:30 PM)

-Conveners: Reinhard Buettner

| time | [id] | title | presenter |
|---------|------|--|----------------------|
| 2:00 PM | M207 | Untwining the heterogeneity of ALK-rearranged non-small cell lung cancer using spatially resolved transcriptomics | Dr NOH, Ka-Won |
| 2:18 PM | M221 | Feasibility of the Anti-carcinoembryonic antigen Monoclonal Antibody-dye conjugate, SGM-101, for Near-infrared Fluorescent Cancer-specific Intraoperative Imaging for Gastric Cancer using Xenograft Animal Models | Ms KOO, Annie Eunhee |
| 2:36 PM | M100 | NR2F2 controls malignant squamous cell carcinoma state by promoting stemness and invasion and repressing differentiation | SONG, Yura |
| 2:54 PM | M226 | Clinical applications of circulating tumor cells in non-small cell lung cancer | Mr GUPTA, Varun |
| 3:12 PM | M283 | The development of a design for an ideal laboratory for cancer biophysics | KENAR LIM, Necla |
